Mike and Will,

The response has continued to grow and we now have 9 STARTs mobilized to the response to collect surface water samples. In addition, we have two STARTs working at the Addison COOP alongside OSC Foster. We also have several data managers, GIS/IT personnel, and analytical persons supporting remotely creating maps and organizing laboratory analyses. Tasking OSC is Althea Foster and OSC Mark Hayes is onsite in NM with our team.

We will begin preparing a Daily Chronology summarizing technical and financial information for you.

Please let me know if you have any questions or need additional information.

Ceci Shappee

Subject: ER Activation

This evening START was verbally tasked to support response activities. Details are below.

PRP:Unknown. Gold King Mine remediation site in EPA R8, San Juan County, CO.
Location:Region 6 portion extends from CO/NM state line along Animas River through Farmington, NM.
Description:Uncontrolled release of acid mine waste estimated to be 1+M gallons into tributary of Animas River.
NRC no.N/A
Tier Level:Tier 3
Tasking OSC:Althea Foster

Response OSC:Mark Hayes

START Team:Larry Howard, Tori Gomez, Ben Latham, Corey Bercher, Derrick Cobb, Sean Gavlas.

START has been tasked to mobilize two persons tonight (Gomez and Howard) and the remaining team members early Friday morning. Tasks include water quality monitoring and water sample collection along suspected impact areas along the surface water pathway, including surface water intake for drinking water and agriculture use.
